Game Theory Lecture Notes

theory — which you should have seen at least a bit of last term — is the study of how an individual makes decisions in non-strategic settings; hence game theory is sometimes also referred to as multi-person decision theory The common terminology for the field comes from its putative applications to games such as poker, chess, etc

A Model of Casino Gambling - Yale University

A Model of Casino Gambling Nicholas Barberis Yale University February 2009* Abstract Casino gambling is a hugely popular activity around the world, but there are still very few models of why people go to casinos or of how they behave when they get there In this paper, we show that prospect theory can offer a rich theory of gambling,
